LAB # 2

Lab Session 2: Essential MS Word Formatting

Objective:

Gain proficiency in Word formatting, covering styles, section breaks, document management, TOCs, and cross-references.

Required Equipment / tools:

1. A computer with **Microsoft Word** installed (any version with advanced formatting features).
2. A sample document to apply formatting techniques.

1. Introduction:

In this lab, you will learn to apply advanced formatting techniques in Microsoft Word. These skills are essential for creating professional-looking documents, especially for long reports, theses, and research papers. The lab will guide you through using custom styles, managing section breaks, creating a table of contents, and applying cross-references for easier navigation.

2. Procedure:

Follow the steps given below to complete each task.

2.1 Creating and Applying Custom Styles

1. Open a new blank document in Microsoft Word.

Figure 2.1.1

2. Create a custom style for the title of the document:
 - Go to the **Home** tab → open the **Styles Pane** → click **New Style**.

Figure 2.1.2

- Set the style name as "Lab Title" and format it with **24pt Times New Roman, Blue colour**.

Figure 2.1.3

3. Apply this style to the title of your document.
4. Create another custom style for section headers (e.g., "Lab Section Header") with **16pt Bold, Underlined text**, with **Blue color** and apply it to each section heading.

Figure 2.1.4

2.2 Using Section Breaks

1. Add at least three sections to your document: Introduction, Method, and Results.
2. Insert section breaks between these sections:

- Go to the **Layout** tab → click on **Breaks** → choose **Next Page** under **Section Breaks**.

Figure 2.2

- Verify that each section begins on a new page.

2.3 Managing Long Documents

- Open the **Navigation Pane** by going to the **View** tab → check the box for **Navigation Pane**.

Figure 2.3

- Apply **Heading 1** style to all section headers (Introduction, Method, Results).
- Use the **Navigation Pane** to scroll through the sections of your document.
- You can click on any of the section headers in the Navigation Pane to quickly jump to that section of your document. This is particularly useful in long documents, as it allows you to easily navigate between sections without scrolling manually.

Figure 2.4

2.4. Inserting a Table of Contents (TOC)

1. Place your cursor at the beginning of your document.
2. Insert a Table of Contents:
 - Go to the **References** tab → click on **Table of Contents** → select an automatic TOC format.

Fig 2.5

The TOC should reflect all your headings.

1. Add more sections and update the TOC by right-clicking on it → select **Update Field**.

Fig 2.6

2.5. Applying Cross-References

1. Insert a reference to the “Results” section within the “Introduction” section.

- Go to the **References** tab → click on **Cross-reference**.

Fig 2.7

- Choose **Heading** under **Reference Type** and select **Page number** under **Insert reference to**.

2. This will link the Introduction to the Results section, showing the page number dynamically.

Figure 2.8

2.6. Finalizing and Saving the Document

3. Review the document for correct formatting (styles, section breaks, TOC, cross-references).
4. Save the document as **Lab1_YourName.docx**.

Figure 2.9

Class Tasks:

3. Observation

--

4. Class Tasks:

1. Design and apply a custom style for bullet points that includes a specific font and color scheme to enhance document readability.
2. Create a multi-part document with at least four sections and use section breaks to change the layout (e.g., landscape orientation for one section).
3. Use the Navigation Pane to organize your document by applying different heading levels (Heading 1, Heading 2) to create a clear hierarchy of information.

5. Home Tasks:

1. Create a Table of Contents that automatically updates when you add or remove sections, and customize its appearance using different styles.

2. Add at least two cross-references within your document that link to figures or tables, ensuring they dynamically update when the document changes.
3. Perform a final review of your document for spelling and grammar, apply consistent formatting, and save it in both **.docx** and **.pdf** formats.

6. Discussion and analysis of results:

7. Conclusion
