LAB # 4

Lab Session 4: Advanced Features of MS Word – Page Layout, Images, and Document Elements

Objective:

Enhance document presentation by applying advanced MS Word features such as images, page layout customization, headers, footers, page numbering, and footnotes.

Required Equipment / tools:

1. A computer with Microsoft Word installed (any version with page layout and references features).
2. Sample text content and image files (JPEG/PNG).

1. Introduction:

In this lab, you will learn to enrich Word documents with page design and professional elements. You will practice inserting and formatting images, customizing page layouts (margins, orientation, breaks, columns), and adding document elements like headers, footers, and page numbers. You will also work with footnotes and endnotes to give references in academic-style documents. These skills are essential for creating polished assignments, reports, and publications.

2. Procedure:

Follow the steps given below to complete each task.

Task 1: Insert and format images (resize, crop, apply text wrapping).

Task 2: Adjust page layout (set margins, change orientation, insert page breaks, apply columns).

Task 3: Insert and customize headers, footers, and page numbers.

Task 4: Add footnotes and endnotes in a sample paragraph.

Task 1: Insert and Format Images (Resize, Crop, Apply Text Wrapping)

Step 1: Insert an Image

1. Open your Word document.
2. Go to the Insert tab → click on Pictures.
3. Choose This Device to insert an image saved on your computer.
4. Select the image file (e.g., .jpg or .png) and click Insert.

Step 2: Resize the Image

1. Click on the image once to select it.
2. Small circles (handles) will appear around the edges.
3. Drag a corner handle inward or outward to resize the image proportionally.
4. To resize without keeping proportion, drag the side handles (not recommended for photos).

Step 3: Crop the Image

1. Select the image → go to the Picture Format tab (appears when the image is selected).
2. Click Crop in the Size group.
3. Black crop handles will appear around the image.
4. Drag the crop handles to cut unwanted parts of the image.
5. Press Enter or click outside the image to apply the crop.

Step 4: Apply Text Wrapping

1. Select the image → click the Layout Options icon (appears next to the image).
2. Choose a wrapping style:
 - a. In Line with Text (default, behaves like text).
 - b. Square (text flows around the image in a box shape).
 - c. Tight (text flows closely around the image edges).
 - d. Top and Bottom (text stays above and below the image).
 - e. Behind Text (image goes behind text).
 - f. In Front of Text (image covers text).

Task 2: Adjust Page Layout (Set Margins, Change Orientation, Insert Page Breaks, Apply Columns)

Step 1: Set Margins

1. Go to the Layout tab in the ribbon.
2. Click on Margins in the Page Setup group.
3. Choose from predefined options (Normal, Narrow, Wide, etc.).
4. To create your own margin size, click Custom Margins → enter values for Top, Bottom, Left, Right → click OK.

Step 2: Change Page Orientation

1. Stay in the Layout tab.
2. Click Orientation in the Page Setup group.
3. Select either:
 - a. Portrait (vertical page – default).
 - b. Landscape (horizontal page – useful for wide tables or charts).

Step 3: Insert Page Breaks

1. Place the cursor where you want to start a new page.
2. Go to the Layout tab → click Breaks in the Page Setup group.
3. Choose Page under Section Breaks.
4. Your text after the cursor will move to a new page.

Step 4: Apply Columns

1. Select the text you want to arrange into columns (or place the cursor in a blank page).
2. Go to the Layout tab → click Columns in the Page Setup group.
3. Choose:
 - a. One (default).
 - b. Two or Three (standard columns).
 - c. More Columns... to customize (set exact number, spacing, line between columns).
4. The selected text will now appear in columns, like in a newspaper layout.

Task 3: Insert and Customize Headers, Footers, and Page Numbers

Step 1: Insert a Header

1. Go to the **Insert** tab.
2. Click **Header** in the Header & Footer group.
3. Choose a built-in style (e.g., Blank, Banded, etc.) or select **Edit Header**.
4. Type your desired text (e.g., document title or your name).
5. To exit the header, double-click anywhere outside the header area or press **Esc**.

Step 2: Insert a Footer

1. Go to the **Insert** tab → click **Footer** in the Header & Footer group.
2. Choose a style or select **Edit Footer**.
3. Type your text (e.g., course name, lab session, or university name).
4. Exit by double-clicking outside the footer area.

Step 3: Insert Page Numbers

1. Go to the **Insert** tab → click **Page Number**.
2. Choose the position:
 - **Top of Page** (header).
 - **Bottom of Page** (footer).
 - **Page Margins** (side).
 - **Current Position** (where the cursor is placed).
3. Select a number style (e.g., 1, 2, 3 or i, ii, iii).
4. Page numbers will automatically update throughout the document.

Step 4: Customize Page Numbers

1. Go to **Insert** → **Page Number** → **Format Page Numbers**.
2. Choose a numbering style (1, 2, 3 or i, ii, iii, or a, b, c).
3. Under **Page numbering**, choose:
 - **Continue from previous section** (numbers flow throughout).
 - **Start at:** to begin with a custom number.
4. Click **OK** to apply changes.

Step 5: Different First Page or Odd/Even Pages

1. Double-click inside the header or footer to activate editing.
2. In the **Header & Footer Tools** → **Design tab**, check:
 - **Different First Page** (use a blank header/footer on page 1).
 - **Different Odd & Even Pages** (use different headers/footers for odd vs. even pages).

Task 4: Add Footnotes and Endnotes in a Sample Paragraph

Step 1: Insert a Footnote

1. Place the cursor at the end of the word or sentence where you want to add a note.
2. Go to the **References** tab.
3. In the **Footnotes** group, click **Insert Footnote**.
4. A small superscript number will appear in the text, and the cursor will move to the bottom of the page.
5. Type your note (e.g., *This concept is frequently used in academic writing.*).

Step 2: Insert an Endnote

1. Place the cursor where you want the note reference to appear.
2. Go to the **References** tab → **Insert Endnote**.
3. A superscript number will appear in the text, and the cursor will move to the **end of the document**.
4. Type your note (e.g., *This endnote provides additional details at the end of the paper.*).

Step 3: Switch Between Footnotes and Endnotes

1. Go to the **References** tab → click the small **arrow** in the bottom-right of the Footnotes group.
2. In the **Footnote and Endnote** dialog box:
 - Choose **Convert** to switch between footnotes and endnotes.
 - Adjust number format (1, 2, 3 or i, ii, iii or a, b, c).
 - Apply numbering for the whole document or restart with each section.

Step 4: Navigate Between Notes

1. In the **References** tab, use the **Next Footnote** drop-down to move between footnotes and endnotes in your document.
2. Edit or delete notes as needed.

3. Observation

4. Class Tasks:

1. Create a two-page document that includes:
 - a. One formatted image with text wrapping.
 - b. Page orientation: first page in portrait, second page in landscape.
2. Add a header with your name and a footer with automatic page numbers.
3. Insert one footnote explaining a sentence in your document.
4. Insert one endnote at the end of your document.

5. Home Tasks:

1. Add at least two images with captions and apply different text wrapping styles.
2. Create a three-column newsletter-style page with sample text and one image.
3. Insert page numbers in Roman numerals (i, ii, iii) for the first three pages.
4. Insert one endnote and prepare a short bibliography list with at least two sample references.

6. Discussion and analysis of results:

7. Conclusion
